

Experts in residential and prestigious homes, Spadeoak was approached by a private client to transform their existing driveway from an old asphalt tar and chip surface to something which would compliment the fantastic property.

**OVERVIEW**

**SECTOR**

Residential

**LOCATION**

Surrey

**SCOPE**

Resin installation

**MATERIAL**

Open-graded base course

Resin bound surface course

Spadeoak were approached by a private client to resurface their driveway. The existing driveway was an old asphalt tar and chip surface, defected with loose chippings and the potential to cause damage

Tasked with providing a solution that would compliment to Tudor style home and maintain the natural stone look of the existing driveway Spadeoak recommended a new resin solution completed in a soft sand colour.

Spadeoak laid an open-graded asphalt base course, ready for a new Resin Bound surface. Upon the newly laid asphalt we installed a 6mm 'Barley Butter' Resin Bound Gravel.

The final outcome was stunning and our client was over the moon with the delivery and quality finish.
