LOCATION

Leeds

SCOPE

Install a Multi-Use Games Area to play a variety of sports

PROJECT DURATION

20 weeks

Leeds Trinity University required an area that gave them the flexibility to offer students a full-size football, 3no 5-a-side football and hockey pitch.

Having gained a thorough understanding of the specific requirements and our experience, Spadeoak were able to offer a total design and construction package.

The package consisted of the pitch installation, surrounding 3m sports fence line, floodlights and groundwork. Spadeoak groundwork teams had to provide a sufficient area for the sports pitch, this included building up an area of land and providing support to ensure the pitch specifications could be met, fencing the area to minimise safety risks

Spadeoak installing a polymeric surface, a material ideal for providing a wide variety of sports to be played on. A polymeric surface offers great grip when wet and a high degree of impact absorbency that reduce the risk of injury and increases comfort during play.

The entire project was completed in 20 weeks and delivered to schedule.
