About ECOPact

The new ECOPact range features a unique Active Setting Carbon Saving, delivering greater carbon reduction, with no compromise on performance, compared to standard concrete materials. The range is available in four materials to suit all budgets.

The ECOPact Range

ECOPact

30%

Blended cement that has 30% CO2 reduction.

ECOPact^{MAX}

**ULTRA
LOW**

Using cement alternative technology such as alkali activation with alkali activators, offering a substantial CO2 reduction.

ECOPact^{PRIME}

50%

An engineered material utilising higher blends of cements using GGBS delivering over 50% CO2 reduction.

ECOPact^{ZERO}

0

You can choose to make any ECOPact product carbon neutral, upgrading your product to ECOPact Zero.

* Reductions compared to a standard concrete (CEMI) mix.
